

# PAWAN KUMAR RAM

Frontend Developer | SAP ABAP Trainee

pawansham578@gmail.com | +917972866251 | Bihar

GitHub | LinkedIn

## Professional Summary

A backend and frontend developer is very passionate about technology with experience in both frontend, like React, and backend SAP ABAP. Experience building dynamic web apps, solving technical challenges, and developing scalable, user-centric solutions. Dedicated to always learning and working on high-impact tech projects.

## Experience

### SAP ABAP Trainee At Bipard | Patna

5 June-9 July

- Expertise in creating technical customizations, such as creating tables, search helps, structures, and other objects in DDIC.
- Hands-on experience in resolving technical issues using the debugger tool.
- Hands-on experience in developing complex reports as per client requirements.
- Focused on hands-on implementation, debugging techniques, and SAP standard development practices.

### Ethical Hacking and Penetration Testing | (C-DAC), Noida

Jan 2025–Mar 2025

- Hands-on experience to do ethical hacking and some penetration testing/vulnerability assessment manually in a simulated lab.
- Applied industry-standard network security, web application testing, and cyber defense methods.
- Acquired a foundational understanding of how to identify and understand computer security dangers and defenses, and a general familiarity with how to more effectively secure computer systems in your personal life and in the company.

## Skills

Programming Languages: C++ (DSA), ABAP, JavaScript, TypeScript, HTML5, CSS3

Libraries/Frameworks: React JS, Redux, Tailwind CSS, Material UI

Tools/Platforms: Git & GitHub, VS Code, SAP, Figma

## Projects

### Blog Application | Link

ReactJS, Appwrite, Tailwind CSS

Built a full-stack blog app with React, Vite, Appwrite, and Tailwind CSS. Implemented user authentication, CRUD functionality for posts, and a responsive UI to ensure a good user experience. Integrated **Appwrite** for better management of database and storage, which improves performance and scaling.

### MoodMate | Link

ReactJS, Tailwind CSS, Local Storage

Built a responsive mood-tracking web app with React, Tailwind CSS, and local storage. Features emoji-based logging, calendar visualization, a statistics dashboard, and data export/download capabilities.

### AI Agency Landing Page | Link

ReactJS, Framer-Motion, Tailwind CSS

Create high-converting landing pages for my AI agency. Using ReactJS, Tailwind CSS, and Framer Motion, we utilized smooth animation or used clean, engaging animation and a user interface to present our AI solutions and generate client queries.
